Managed Migration

Move and improve your bug bounty program quickly and painlessly

Migrating your bug bounty programs to a new platform shouldn't give you a headache. Bugcrowd offers a fully managed migration program at no extra cost.

Our Customer Success Team helps you complete your migration in roughly two weeks from project kickoff, using your investments and progress to date as a foundation for the process.

That's not all. We'll make your long-term success and satisfaction our top priorities. Using data-driven insights as our guide, we're committed to helping you launch, manage, grow, and get value from your programs over time.

What makes migrating to Bugcrowd a breeze?

	Fully Managed	✓
	Expert Guidance	✓
	No Extra Cost	✓
	Done in ~2 Weeks	✓

Your complimentary, fully managed migration includes the following:

Strategy review

We'll review the goals of your current program and any existing integrations. Then we'll share expert recommendations based on our decade of experience in customer success and help you adjust the scope, reward levels, or other things as needed.

Data export/import

Next, we'll analyze reports you provide and import user details, roles, access levels, and data about known and remediated vulnerabilities into the Bugcrowd Platform.

Hacker outreach (if needed)

Hackers you know and trust are likely already hunting on Bugcrowd, so they can pick up where they left off and you can maintain meaningful relationships. If needed, we'll recommend ways to improve crowd composition and engagement to keep the right hackers working on your programs.

Average Migration Timeline

| DAY 1	DAYS 2–5	DAYS 6–8	DAYS 9–11	DAYS 12–14
Kickoff: Strategy Review	Data Export	Data Import	Data Validation	Engagement (if needed)

83% of ethical hackers and security researchers believe that Bugcrowd offers them more opportunities for success than other platforms[1].

Why Bugcrowd

Bugcrowd is more than just a crowdsourced security company; we are a community of cybersecurity enthusiasts, united by a common purpose: to safeguard organizations from attackers. Our AI-powered, multi-solution crowdsourced security platform is built on the industry's most extensive repository of vulnerabilities, assets, and hacker profiles, meticulously curated over the past decade. This ensures that we identify the perfect hacker talent for each unique challenge, providing the scalability and adaptability needed to defend against threats, no matter how unique they may be.
